### Summary |

Pursuant to S.C. Code Sections 44-35-20 through 44-35-40, the Department collects, processes, and analyzes newly diagnosed cancer cases among South Carolina residents that are reported from various medical facilities. The Department proposes amending R.61-45 to address several updates since the regulation was originally promulgated in 1998. These proposed changes may include updating the definition of reportable cases, updating the name of entities that have changed, and updating language to reflect electronic reporting advances. Additional clarification may be added for data items that are required to be reported, and which entities are responsible for reporting cases in the instance of facility mergers or acquisitions.

The proposed amendments may also include corrections for clarity and readability, grammar, punctuation, codification, and other such regulatory text improvements.

The Administrative Procedures Act, S.C. Code Section 1-23-120(A), requires General Assembly review of these proposed amendments.
